LEARNING GOALS

After this lesson, you will be able to:

Define what artificial intelligence (AI) is.

Understand what makes generative Al unique.

Reflect on the benefits and drawbacks of generative Al.

HAVE YOU EVER HEARD OF ARTIFICIAL INTELLIGENCE (AI)?

TYPE IN CHAT

- Where have you heard or seen Al?
- What are some examples of things that you think AI can do?

We're going to watch a video that explains what AI is. And we'll learn about a specific kind of AI that is quite popular right now, called generative AI.

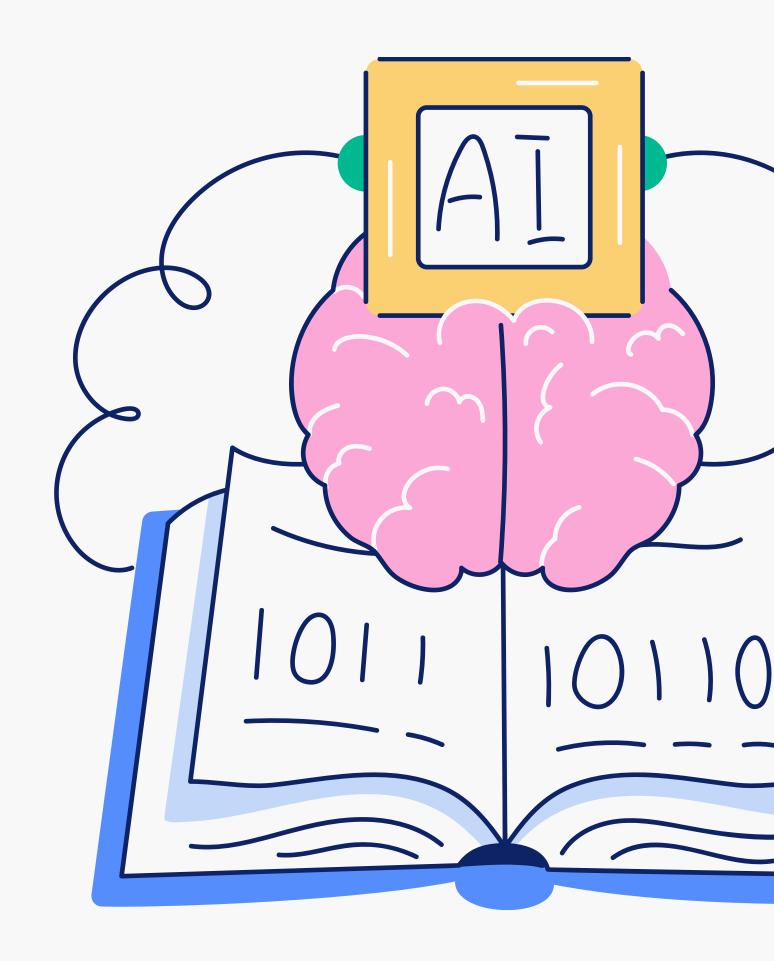

- What is artificial intelligence?
- How does artificial intelligence learn?
- What makes
- "generative Al" unique?

To watch the video on the Common Sense website, click <u>here</u>

WHAT IS AI?

- Artificial Intelligence: a computer program that can perform tasks that typically require human intelligence
- Artificial intelligence learns by analyzing data, or information. The more data you feed to an AI, the more accurate it can become at completing a task.
- Generative AI: a type of AI that can create content, including text, images, and audio

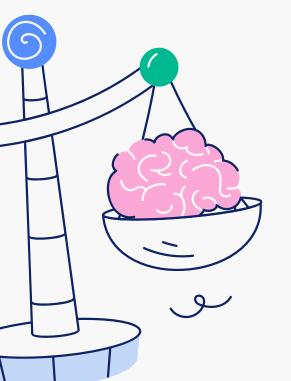

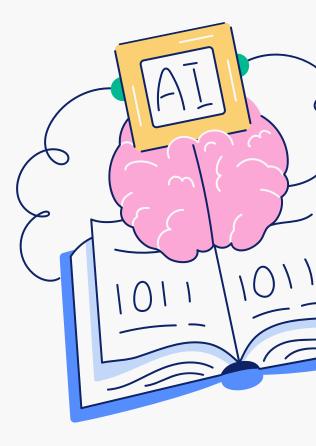

HELPFUL OR HARMFUL?

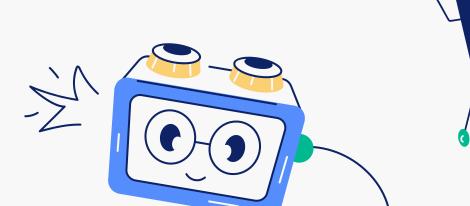

- Given what you know, do you think generative AI will be more **helpful** or more **harmful** to society?
- Pick the side that you agree with the most. <u>Be sure to have at least one reason to support your opinion.</u>

HOW COULD GENERATIVE AI BE HARMFUL TO SOCIETY?

Grab a sticky note or textbox and write your answer on the board. (Use Engageli Whiteboard Tools)

HOW COULD GENERATIVE AI BE HARMFUL TO SOCIETY?

- Misinformation: It could be used to create fake articles, videos, or images that are convincing and can be shared easily.
- Plagiarism and copyright issues: It might have learned using data without permission, or it might not give credit to its sources.
- **Bias:** It might be trained on biased or incomplete information.
- Other harms: Impersonation, cyberbullying, privacy threats, etc.

HOW COULD GENERATIVE AI BE HELPFUL TO SOCIETY?

Grab a sticky note or textbox and write your answer on the board. (Use Engageli Whiteboard Tools)

HOW COULD GENERATIVE AI BE HELPFUL TO SOCIETY?

- **Efficiency:** People could use it to be more productive in their jobs (data entry, writing, analyzing information, etc.)
- Creativity: Could produce high-quality creative content, including art, music, and writing.
- Learning: It can help people learn new skills.
- Other helpful contributions?

RECAP

Balancing the potential benefits and drawbacks of a new technology can be tricky. When it comes to AI and generative AI, we must think critically about its impacts and remember that we're each in control of how we use it.

Over the next 2 weeks, we will discuss both the pros and cons of AI and how to use it safely and correctly.
